

Ugwu Victor Obinna

Full Stack Web Developer

Solid foundation in designing and developing websites using React for the frontend and Node.js for the backend. With a growing portfolio and few years of hands-on experience, I am eager to contribute to full-stack development projects, bringing enthusiasm and a commitment to learning and improving.

Work Experience

Front-End Developer (Remote) June 2022 - Date *Katalyst Tech*

- Creating visually appealing and user-friendly web application prototypes using industry-standard tools such as Figma and Adobe Illustrator for user experience and user interface design.
- Redesign and development of the Sprynx Multi Car-Care website, as well as the Remote Gym web application for Eric Villagio Fitness. Additionally, I have played a key role in the remodelling of Wildstream's user interface and made significant contributions to the Mercedes Pay web app.

Front-End Developer (Contract) February 2023 - April 2023 *iSabiTv*

- Enhanced legacy code to meet current specifications and develop new features to improve software functionality.
- Debugged and troubleshoot existing codes to ensure smooth operation of the codebase.
- Picked up Next.js, Mobx state management, Material UI and bettered my debugging skills.

Web Development BootCamp Trainee(Frontend) January 2022 - May 2022 *Udemy*

- Creation of reusable React components and states in making beautiful and functional web applications
- Efficient knowledge and use of front-end technologies, including HTML, CSS, Javascript, Redux, and Axios for API manipulation.
- Demonstrated abilities in efficiently utilizing modern web development technologies to create dynamic, user-friendly web experiences

Projects

Proctoria *React.js, tailwind css, express.js, Node.js, MongoDB*

A fullstack exam management system that quizzes a user, marks and displays results

BookStore *React js, tailwind css, express js, Node js, MongoDB, Material UI*

A full stack bookstore web app to demonstrate CRUD operations and other core backend technics

iSabiTv (Contributor) *Next js, Mobx, Material UI, CSS, API and Google Auth integration*

A full stack video web application that models tiktok.

Eric Villagio *React js, HTML, CSS, Tailwind CSS, Axios*

Feature a good use of basic HTML tags, CSS variables and react components to model the functionality of a modern gymnasium.

My Portfolio Website *React js, HTML, CSS*

Feature a good use of basic HTML tags, CSS variables and react components.

React useState hook and useRef to post to social accounts via email js

Other Notable Contributions

- The front-end design of h2o.ng website
- Other snippets of functional codes covering the primary use of the useEffect hook, Axios and other functionalities of the React js libraries can be found in my GitHub account above.

Education

Madonna University Elele, Rivers State Nigeria October 2011 - August 2015

B.S c Computer Science.

Talent for Startup Fullstack Web Developement Trainee March 2024 - July 2024 *Univelcity*

- Creation of reusable React components in making functional web applications.
- Designed database schemas for efficient data storage and retrieval, and developed robust server-side applications using Node.js, ensuring high performance and scalability
- Implemented middleware for handling authentication, authorization, and data validation.

Skills

- React js, JavaScript, TypeScript, API manipulation
- HTML, CSS, bootstrap, Tailwind CSS
- User Interface (UI), Responsive Web Design, User Experience (UX), Wire Framing
- REST, JSON, APIs
- Node js, Express js, Mongo DB

Interests

Technology, Sports, Music, Art.
